

AlarmTab® offers you the possibility to access your central office from **any device with Internet access** via secure connections and password protection. It's like you're at home on site.

You can switch everything on and off, activate and deactivate sensors, control devices remotely, start sirens and alarm loudspeakers, switch on the heating or air conditioning timer and much more.

You can download a very well-designed app from the [Apple Store](#) or [Google Store](#) to your smartphone or use the more comprehensive browser access.

AlarmTab® offers you a completely new freedom to control your system and your home or company conveniently and quickly from a distance.
